

Kjeld Hermansen (KH) is chief physician at Department of Endocrinology and Internal Medicine, Aarhus University Hospital. He has been adj. professor in human and clinical nutrition at Copenhagen University since 2006. KH has been International advisor for the Swedish Nutrition Foundation. He has participated in the development of the European guidelines for the nutritional treatment of diabetes in 2004 and 2016 for the Diabetes and Nutrition Study Group under the European Association for the Study of Diabetes (EASD). KH was president of the Danish Endocrine Society 1997 – 2000, for The Diabetes and Nutrition Study Group (EASD) 2000 – 2004 and is member of The Danish Council on Health and Disease Prevention. KH has extensive experience with human intervention studies to prevent the development of metabolic syndrome and type 2 diabetes. He has explored the role of glycaemic index, dietary fibers, alcohol/beer, and the quality of proteins and fats on blood glucose, postprandial lipaemia and cardiovascular risk. KH has published more than 325 papers in international journals e.g. on alcohol and diabetes.
